About the Webinar

Three alumni from Physics Department have been invited to share their career and job hunting experience with students. All three are graduates of the class of 2016 (BSc in Green Energy Science). They treasure highly their undergraduate experience, and have ventured into different career pathways including entrepreneurship and environmental protection in HK. The sharing will be conducted primarily in Cantonese, but English will be intermittently used. The talks are targeted for undergraduates, but all who are interested in general job hunting and career advice are welcome.
